## Auto Auction Segment (2) Average Price of Vehicle Contracted

■ Lower supply of new cars because of shortage of auto parts $\rightarrow$ Decline in trade-in vehicles
$\rightarrow$ Decline in the number of used cars on the market $\rightarrow$ Tight supply-demand balance
$\rightarrow$ Spike in auction prices
■ The average prices were higher compared to the same month in the previous year from June 2020 to Jan. 2023.

- The average price of vehicles contracted remains high, although it has been declining since the September 2022 peak.

## Used Vehicle Purchasing and Selling Segment

In the Rabbit used vehicle purchasing business, sales and earnings were higher because of the larger number of vehicles sold and an increase in the number of higher-priced vehicles sold.

```
Net sales \(¥ 6,187\) million (up 16.8\% YoY)
```

Operating profit $¥ 10$ million (up 45.5\% YoY)

In the accident-damaged vehicle purchasing and selling business, sales were higher but earnings were down. This was the result of higher prices and a larger number of vehicles sold and a decline in the gross profit caused by lower prices of vehicles sold at auctions.

Net sales $¥ 4,204$ million (up 5.0\% YoY)
Operating profit $¥ 9$ million (down 67.6\% YoY)

## Recycling Segment

Sales and profit declined in the recycling business because of a decline in the number of end-of-life vehicles consigned and sluggish scrap iron markets.

Net sales $¥=0,0.56$ million
(down 5.5\% YoY)
Operating profit $¥=532$ million
(down 42.8\% YoY)
In the industrial plant recycle business, sales and earnings increased because of the larger number of orders for large demolition projects.

## TOPICS A New Automobile Loan Product Using a Tie-up with GMS

■ USS established an equity and business alliance with Global Mobility Service, which is a provider of a diverse lineup of fintech services.

- The launch of this new automobile loan will enable people who previously were unable to obtain a loan for a variety of reasons to finally own a vehicle.
- This loan is expected to raise activity in the automobile auction market by increasing the number of people who are able to buy a used vehicle.

A person who is unable to use a conventional loan can now purchase a car

MCCS is a proprietary on-board loT device provided by GMS that can communicate with various mobility and data worldwide (GMS has acquired the patent for this technology).

FY2023
Consolidated Forecast

## FY2023 Consolidated Forecast

- New car sales are expected to recover
- USS takes steps to further upgrade convenience and services for members and maintain a large number of vehicles consigned in order to raise its share of Japan's auto auction market.

## Automobile Market and USS Revenue

- The supply of used cars for automobile auctions is significantly affected by the number of cars traded in when purchasing a new car. Therefore, this supply changes with (1) the number of new car registrations and (2) the number of used car registrations.
- Total demand comprises domestic demand (2) and overseas demand (3). In recent years, total demand has been driven mainly by overseas demand.
■ In addition to the above, share of the used car auction market and contract ratio have an important bearing on USS auto auction profits.

## New/Used Car Registrations and Auto Auction Market

- The auction market continued to expand till 2000 as the share of used vehicles sold through the auction market increased as a share of the total used vehicle market.
- Starting in the mid-2000s, older vehicles and vehicles with high mileage which would normally have been scrapped started flowing into auto auction sites and steadily drove up the number of vehicles consigned.
- After the financial crisis of late 2008 the auto auction market was largely correlated to new car registrations (supply) and exports (demand).

New/Used car registrations, used car exports, vehicles consigned and vehicles contracted (CY)
