## Automobile Market and USS Revenue

■ The number of vehicles consigned is correlated through trade-ins to (1) New car registrations and (2) Used car registrations

- Total demand comprises domestic demand (2) and overseas demand (3). In recent years, total demand has been driven mainly by overseas demand.
- In addition to the above, share of the used car auction market and contract ratio have an important bearing on USS auto auction profits.

## New/Used Car Registrations and Auto Auction Market

■ The auction market continued to expand till 2000 as the share of used vehicles sold through the auction market increased as a share of the total used vehicle market. Starting in the mid-2000s, older vehicles and vehicles with high mileage which would normally have been scrapped started flowing into auto auction sites and steadily drove up the number of vehicles consigned.
■ After the financial crisis of late 2008 the auto auction market was largely correlated to new car registrations (supply) and exports (demand).
New/Used car registrations, used car exports, vehicles consigned and vehicles contracted (CY)
