To All Stakeholders:

USS Co., Ltd.

Designated as B Rank in the CDP Climate Change Survey

USS Co., Ltd. has been designated as B rank in the climate change survey by the Carbon Disclosure Project (CDP), an international non-governmental organization (NGO) that promotes the disclosure of information related to climate change.

Headquartered in London, the CDP collects and analyzes climate change-related information from major corporations throughout the world and assesses their initiatives according to the ranks of A, A-, B, B-, C, C-, D, and D-. The USS Group has been designated as rank three (B) based on our response to the CDP's climate change questionnaire this fiscal year.

We will continue to analyze the risks and opportunities climate change poses to our business and disclose information through the CDP and integrated reports. We will also introduce renewable energy and adopt energy-saving equipment to reduce greenhouse gas emissions, aiming to contribute to the realization of a sustainable society.
